

Dick Van Patten's Natural Balance Sweet Potato & Fish Formula

Some dogs may be highly sensitive to commonly used proteins, carbohydrates and food additives in their diet. Allergic reactions can lead to irritable bowel, upset stomach, and a number of skin problems. Natural Balance® has created Sweet Potato & Fish formula for dogs with these food allergies. Our Sweet Potato & Fish formula combines fresh salmon, a single source of animal protein that most dogs have not been exposed to, and fresh sweet potatoes, a single source of carbohydrate not commonly found in dog foods, along with effective natural ingredients to help rebuild the dog's immune system.

Feeding Recommendations

Roger eats 2/3 to 1 cup twice a day. Supplement this feeding schedule with two healthy snacks per day, such as raw vegetables or healthy treats.
