

Nutro Natural Choice Lite

Although Nutro Natural products are not the *very* highest quality pet food, they are better than most, and their Lite formula takes pounds off doxies like nothing else we've tried. We strongly recommend feeding it as a temporary diet food for overweight doxies. Once the doxie's weight is under control, we recommend switching to a high quality kibble, such as California Natural or Evo.

Feeding Recommendations

We feed ¼ cup twice a day to mini dachshunds, 1/3 cup twice a day to tweenies, and ½ cup twice a day to standards. Supplement this feeding schedule with two healthy snacks per day, such as raw vegetables or healthy treats
